

ADDITIONAL MICROBEE NOTES

1) The disk supplied will boot on a 128k Premium Microbee. In order to run PrintMaster on the 256TC, you first need to boot CP/M on the computer, insert the PrintMaster disk, and type PM followed by carriage return.

2) The Drawing Pad and on-screen graphics are not currently available on the Microbee version of PrintMaster.

3) The version you have received is the very latest PrintMaster Plus. In fact, PrintMaster Plus and PrintMaster are the same program.

4) Two additional libraries of artwork are available for use with PrintMaster. Art Gallery I and Art Gallery II each provide approximately 140 additional pieces of artwork. Price of each gallery is \$39.95 (ex tax), \$45.30 (inc tax). These are available from wherever you purchased PrintMaster.
